MEMORANDUM

TO

COMMERCE - Mrs. Helen Robbins

CIA -

25X1

SUBJECT : Additional Tasking on Sanctions Date

In addition to the materials requested of you in our Memorandum of August 25, we ask that you prepare the following paper.

-- A chart on oil and gas technology and equipment exported by US and European firms to the USSR which would be affected by a prospective embargo. This should include a list of items that would be covered by such an embargo; the names of the European and U.S. firms (and U.S. subsidiaries in Europe) which are engaged in the export of these items; our best estimate of the dollar value of the current transactions of each type of item by each company as well as transactions which could be affected by a future embargo; and an estimate of the current market share of each exporting company.

-- We also ask that the above chart include data to the extent possible which reflects the exports of the items in question by U.S. and European companies before and after the imposition of U.S. sanctions in December, 1981. (This data will presumably show a down-turn in U.S. company exports but a surge in European company exports).

We recognize the difficulty of estimating the impact of a loss of prospective business to European firms. This will, however, be a preeminent concern in European minds which we must address. We need, therefore, to develop as best we can the kind of information requested above.

Please deliver this material, as well as the information requested in our Memorandum of August 25 to the Executive Secretariat, Room 7224, attention Mr. Bremer.

State Dept. review completed

W. Paul Bremer III Executive Secretary
